

## Nano Facial Filling Serum ( 100% hyaluronic acid serum ) [www.Bellahut.com](http://www.Bellahut.com)

**( HA, Hyaluronan, Cyclic Acid )** is a critical component of the skin that helps to retain moisture, keeping the skin firm, and preventing wrinkles by adding volume to the skin. As we age, our stores of HA diminish, and our skin is no longer able to fight wrinkles as effectively. Replacing the HA is the most effective way to repair damaged, aging skin and that is why it's also the most popular injectable wrinkle and line filler used by Dermatologists. The topical HA in BellaHut Hydration & Firming Solution actually draws moisture into the skin, causing the tissue beneath the skin to swell and thus reducing the prominence of wrinkles. Collagen production is also enhanced as much as 300%. Inflammation may also be reduced and circulation improved, resulting in a better complexion overall and what has been described as a youthful glow. Users often see redness and irritation disappear, which also can diminish many forms of acne. Results typically seen in as few as 3-5 days!

HA plays an important role in the way your skin looks, feels, and functions. A natural complex sugar found in all mammals, it's a major component of the connective tissue matrix in the dermis—the dense, inner layer of skin beneath the epidermis. This matrix is made up of HA as well as two connective fibers—collagen and elastin. By its nature, HA retains water like a sponge, absorbing as much as 1000 times its weight. This helps to attract and maintain water within the extra cellular space, hydrating your skin and increasing its volume and density. HA is also involved with the transport of essential nutrients to the skin's viable cells. HA provides volume, helping to contribute to the skin's overall appearance.

This serum contains 100% pure NASHA grade hyaluronic acid and matrixyl ( there are only two plants worldwide that produce NASHA grade HA ). Using nano-technology, this serum is designed to fill in deep folds and plump the skin while hydrating. This remarkable solution also reduces pore size and repairs sun damage as well. It significantly reduces appearance of wrinkles and restores youthfulness. Our NASHA grade 100% pure Hyaluronic Acid hydrating serum also contains 1.5 % MATRIXYL, which stimulates cells to boost production of collagen and elastin. It is a remarkable solution that enables aged skin tissues to restore themselves to a more youthful state while promoting deep tissue repair. The result is significantly reduced appearance of wrinkles. This concentration is on average 3-6 times higher than other ordinary brands of HA.

**Direction:** Apply on cleansed and toned skin day and night or as often as needed, spread few drops over your face or any dark spots and sun damages on anywhere of your body, can also follow with the moisturizer, eye cream or night cream ( check out my store for more choices of creams and lotions for your anti-aging treatment ).

**You can also have a fabulous facial with BellaHut 100% HA Serum at home-** Use a hot damp towel or washcloth and apply to your face for a few minutes. This will open your pores. Then apply a few drops of HA serum with Matrixyl to your face and neck. Massage the serum into the skin and then apply your favorite moisturizer. You will quickly notice plumping of your skin. You can also use HA serum on your lips. Apply to your lips, then wait until the serum is absorbed. Then apply your favorite moisturizer (Lipstick, Chap Stick or Lip Balm Lip Gloss or Lip Glass). Your lips will feel plump and full. Nighttime application: Before your sleep you can use lip balm over HA Serum on your Lips. By morning your Lips will feel hydrated and plump.

**Matrixyl** is the trademark name for palmitoyl pentapeptide-3, one of the powerful peptide molecules found in the latest generation of high-end anti wrinkle skin care products. This breakthrough ingredient stimulates collagen production in the skin and can even give BOTOX® injections a run for their money in the anti wrinkle department. Matrixyl becomes even more effective when combined with other peptides. Matrixyl is a lipopeptide, a fatty acid mixed with amino acids. It is also considered to be a synthetic isomer (an isomer is a molecule that has an identical structure to another molecule but different atomic components). The active element in Matrixyl is called Micro-collagen—another peptide.

Matrixyl stimulates fibroblasts in aged skin to produce more collagen and constantly reminds our cells to replenish water and synthesize collagen. When stimulated, the skin produces more collagen. Loss of collagen is what leads to thinning skin and the wrinkling of newly inelastic skin. Matrixyl helps to counteract this natural part of the aging process.

Matrixyl 3000 can significantly reduced appearance of wrinkles with no side effects because it is not extracted from animals, it is therefore free of any animal infectious or allergen. In clinical studies, Matrixyl 3000 was shown to:

1. Increase overall collagen synthesis by up to 117.
2. increase collagen IV synthesis by up to 357%
3. increase hyaluronic Acid by up to 267%

It also showed to reduce the surface area occupied by deep wrinkles by a mean of 68%

And...

The surface area occupied by moderate wrinkles was reduced by a mean of 51%

**Nano Facial Filling Serum ( 100% Hyaluronic Acid SERUM ) Ingredients:**

Aqua (Water), Sodium Hyauronate (Hyaluronic Acid), Potassium Sorbate, Citric Acid

**Cautions:** Keep out of reach from children. Although rare, should you should experience any irritation or an adverse reaction, discontinue use and consult a physician. BellaHut Hydration & Firming Solution hydrates so well that is possible to overhydrate. While not harmful, overhydration may produce small acne like, water filled bumps. If you experience this by using too much, stop use for a few days, then go back to apply it every other day. Also, exfoliation will allow the skin to breathe better and prevent clogged pores.
